The Redmond Aldrich Design Kit contains selections for wall coverings, floor coverings, window treatments, lighting fixtures, upholstered furniture, case goods and accessories. It includes two floorplans, and alternate options at our discretion. All sources are retail and purchasing is the responsibility of the client. If an item is back-ordered or out of stock by the time the client orders, it is not the responsibility of Redmond Aldrich Design. However, if you ask nicely we will try to find a replacement for free. If significant revisions need to be made for any kit, we will recommend becoming a full-service client of Redmond Aldrich Design, subject to our fees above. If a client wants the custom add-on option, ordering and coordination will be done through our office with a standard 30 percent markup.

## HOW TO MEASURE & PHOTOGRAPH

### SUPPLIES

---

Paper

Pencil

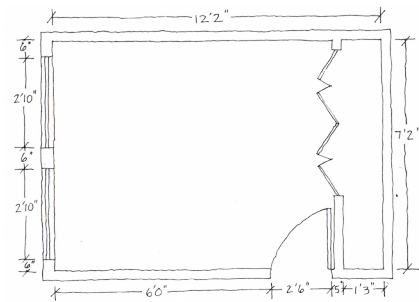

Retractable measuring tape

Camera

### INSTRUCTIONS

---

- 1: Working in plan view (see example) draw a rough outline of your room indicating windows, doors, or any other structural features. (Fireplace, radiator, etc.)
- 2: Begin measuring the length of the walls along baseboards. Measure to the nearest inch and record on corresponding wall in sketch.

- 3: Continue working your way around the room until all walls have been measured and recorded. Make sure the placement of windows, doors and other structural features are recorded.
- 4: Measure height from floor to ceiling.
- 5: Take photos of all walls, along with pictures of all furniture we are using.
- 6: Measure the height, width and depth of all furniture we are using.
